KINETIC MOVEMENT

AMALIA®

Le campane tubolari che catturano il respiro del vento, con il loro armonioso suono ci conducono in uno spazio eterno, uno spazio cristallino e puro.

L'acqua pura, che dona brillantezza al cristallo, trasforma l'ambiente circostante in uno specchio d'acqua, riempiendosi di luce e generando riflessi in continuo movimento.

Una diversa interpretazione e un'inconsueta lettura della luce come elemento architettonico.

Amalia è innovativa sia dal punto di vista tecnologico che di selezione dei materiali.

I tubolari in vetro sono infatti rivestiti da una speciale vernice fotosensibile.

I cristalli, sospesi all'interno dei tubolari, fluttuano lentamente ricreando i riflessi delle onde in movimento.

Completano la complessa architettura di Amalia le luci a led alla base dei tubolari che illuminano i cristalli stessi.

The tubular bells which catch the wind blowing, with their harmonious sound lead us to an eternal space, a pure and crystal-line space.

Pure water, which gives brightness to the crystal, turns the surrounding environment into a stretch of water, filling itself with light and generating continuous moving reflections.

Amalia is a different interpretation and an unusual reading of lighting as an architectural element.

It is innovative from both a technological and a materials selection point of view.

The glass tubulars, indeed, are "dressed" in a special photo-sensitive paint.

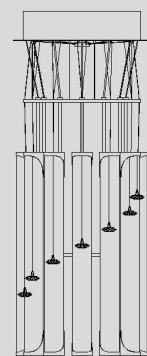

Crystals, floating inside the tubes, slowly fluctuate recreating the waves reflections in motion.

Led lights at the base of the tubes that illuminate the same crystals, complete the complex architecture of Amalia.
